To Whom It May Concern:

As Project Manager for A. T. Designs, Inc., I have had the opportunity to work with Complete Aluminum General Contractors, Inc. on many large projects over the years. They have proven to be a one-stop shop. The fact that they have a full welding shop for handrail, screen enclosures and are a licensed glass and glazing company gives them an advantage that I have not seen with other restoration companies; the attention to protection and detail is unmatched.

Their concrete and window and door replacement divisions are second to none when it comes to preparing a unit for restoration. They go the extra mile to make sure the owners' personal belongings are protected from construction dust and debris. All of their management personnel are highly qualified to oversee large projects and are very detail oriented in keeping all of their project records. They are a top-notch company with some of the best workmanship I have come across in this business. Because everything is done in house, I can always count on the prep work, management, installations and clean up to be done by one of their qualified employees.

I would highly recommend Complete Aluminum on any hi-rise project due to their extensive experience with large condominiums over the past 25 years.

Thank you,
